Autonomous, Model-Based Diagnosis Agents (The Springer International Series in Engineering and Computer Science) Michael Schroeder

Autonomous, Model-Based Diagnosis Agents defines and describes the implementation of an architecture for autonomous, model-based diagnosis agents. It does this by developing a logic programming approach for model-based diagnosis and introducing strategies to deal with more complex diagnosis problems, and then embedding the diagnosis framework into the agent architecture of vivid agents.

Autonomous, Model-Based Diagnosis Agents surveys extended logic programming and shows how this expressive language is used to model diagnosis problems stemming from applications such as digital circuits, traffic control, integrity checking of a chemical database, alarm-correlation in cellular phone networks, diagnosis of an automatic mirror furnace, and diagnosis of communication protocols. The book reviews a bottom-up algorithm to remove contradiction from extended logic programs and substantially improves it by top-down evaluation of extended logic programs. Both algorithms are evaluated in the circuit domain including some of the ISCAS85 benchmark circuits.

This comprehensive in-depth study of concepts, architectures, and implementation of autonomous, model-based diagnosis agents will be of great value for researchers, engineers, and graduate students with a background in artificial intelligence. For practitioners, it provides three main contributions: first, it provides many examples from diverse areas such as alarm correlation in phone networks to inconsistency checking in databases; second, it describes an architecture to develop agents; and third, it describes a sophisticated and declarative implementation of the concepts and architectures introduced.

From reader reviews:

Trisha Sherman:

Now a day people that Living in the era where everything reachable by connect with the internet and the resources inside can be true or not involve people to be aware of each details they get. How individuals to be smart in receiving any information nowadays? Of course the answer is reading a book. Reading through a book can help folks out of this uncertainty Information mainly this Autonomous, Model-Based Diagnosis Agents (The Springer International Series in Engineering and Computer Science) book because book offers you rich information and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it as you know.

Gloria Duncan:

Often the book Autonomous, Model-Based Diagnosis Agents (The Springer International Series in Engineering and Computer Science) will bring one to the new experience of reading a book. The author style to describe the idea is very unique. Should you try to find new book to see, this book very appropriate to you. The book Autonomous, Model-Based Diagnosis Agents (The Springer International Series in Engineering and Computer Science) is much recommended to you to see. You can also get the e-book from the official web site, so you can quicker to read the book.

April Robles:

The reason why? Because this Autonomous, Model-Based Diagnosis Agents (The Springer International Series in Engineering and Computer Science) is an unordinary book that the inside of the book waiting for you to snap this but latter it will surprise you with the secret the item inside. Reading this book next to it was fantastic author who also write the book in such incredible way makes the content inside easier to understand, entertaining approach but still convey the meaning totally. So , it is good for you for not hesitating having this nowadays or you going to regret it. This unique book will give you a lot of rewards than the other book have got such as help improving your proficiency and your critical thinking way. So , still want to postpone having that book? If I were being you I will go to the reserve store hurriedly.

Brian Smith:

Can you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Aim to pick one book that you just dont know the inside because don't evaluate book by its protect may doesn't work here is difficult job because you are scared that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer may be Autonomous, Model-Based Diagnosis Agents (The Springer International Series in Engineering and Computer Science) why because the wonderful cover that make you consider with regards to the content will not disappoint an individual. The inside or content is definitely fantastic as the outside or even cover. Your reading 6th sense will directly make suggestions to pick up this book.
