Foliations on Riemannian Manifolds and Submanifolds Vladimir Rovenski

This monograph is based on the author's results on the Riemannian geometry of foliations with nonnegative mixed curvature and on the geometry of submanifolds with generators (rulings) in a Riemannian space of nonnegative curvature. The main idea is that such foliated (sub) manifolds can be decomposed when the dimension of the leaves (generators) is large. The methods of investigation are mostly synthetic. The work is divided into two parts, consisting of seven chapters and three appendices. Appendix A was written jointly with V. Toponogov. Part 1 is devoted to the Riemannian geometry of foliations. In the first few sections of Chapter I we give a survey of the basic results on foliated smooth manifolds (Sections 1.1-1.3), and finish in Section 1.4 with a discussion of the key problem of this work: the role of Riemannian curvature in the study of foliations on manifolds and submanifolds.

From reader reviews:

Carson McDonald:

Have you spare time for the day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a move, shopping, or went to often the Mall. How about open as well as read a book eligible Foliations on Riemannian Manifolds and Submanifolds? Maybe it is to be best activity for you. You already know beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with their opinion or you have additional opinion?

Leigh Grayer:

In this time globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. Often the book that recommended for your requirements is Foliations on Riemannian Manifolds and Submanifolds this book consist a lot of the information on the condition of this world now. This kind of book was represented how do the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. The actual writer made some research when he makes this book. That's why this book suitable all of you.

Richard Hund:

This Foliations on Riemannian Manifolds and Submanifolds is fresh way for you who has curiosity to look for some information mainly because it relief your hunger associated with. Getting deeper you in it getting knowledge more you know or else you who still having little bit of digest in reading this Foliations on Riemannian Manifolds and Submanifolds can be the light food in your case because the information inside this kind of book is easy to get simply by anyone. These books acquire itself in the form and that is reachable by anyone, that's why I mean in the e-book type. People who think that in publication form make them feel drowsy even dizzy this publication is the answer. So there isn't any in reading a book especially this one. You can find actually looking for. It should be here for a person. So , don't miss the idea! Just read this e-book variety for your better life and also knowledge.

Sandra Leggett:

What is your hobby? Have you heard this question when you got learners? We believe that that concern was given by teacher for their students. Many kinds of hobby, Every person has different hobby. And you know that little person similar to reading or as studying become their hobby. You must know that reading is very important and book as to be the factor. Book is important thing to increase you knowledge, except your current teacher or lecturer. You find good news or update with regards to something by book. Amount types of books that can you choose to adopt be your object. One of them is this Foliations on Riemannian

Manifolds and Submanifolds.
