Peripheral neuropathy is one of the most common diseases most people never heard of and yet, upwards of 20 million Americans have it! It is estimated that 60 to 70 percent of people with diabetes have mild to severe neuropathy. That fact alone is staggering. Other causes include vitamin deficiencies, autoimmune diseases, kidney, liver or thyroid disorders, cancer and a variety of other medical conditions.

According to the Neuropathy Association the extent and importance of peripheral neuropathy has not yet been adequately recognized. The disease is apt to be misdiagnosed, or thought to be merely a side effect of another disease. However, people from all walks of life live with this neurological illness that has been described by those who have it as a tingling or burning sensation in their limbs, pins and needles and numbness.
