Applied Predictive Modeling

Max Kuhn, Kjell Johnson

Applied Predictive Modeling Max Kuhn, Kjell Johnson

Winner of the 2014 Technometrics Ziegel Prize for Outstanding Book

Applied Predictive Modeling covers the overall predictive modeling process, beginning with the crucial steps of data preprocessing, data splitting and foundations of model tuning. The text then provides intuitive explanations of numerous common and modern regression and classification techniques, always with an emphasis on illustrating and solving real data problems. Addressing practical concerns extends beyond model fitting to topics such as handling class imbalance, selecting predictors, and pinpointing causes of poor model performance—all of which are problems that occur frequently in practice.

The text illustrates all parts of the modeling process through many hands-on, real-life examples. And every chapter contains extensive R code for each step of the process. The data sets and corresponding code are available in the book's companion AppliedPredictiveModeling R package, which is freely available on the CRAN archive.

This multi-purpose text can be used as an introduction to predictive models and the overall modeling process, a practitioner's reference handbook, or as a text for advanced undergraduate or graduate level predictive modeling courses. To that end, each chapter contains problem sets to help solidify the covered concepts and uses data available in the book's R package.

Readers and students interested in implementing the methods should have some basic knowledge of R. And a handful of the more advanced topics require some mathematical knowledge.

From reader reviews:

Vera Velez:

The book Applied Predictive Modeling can give more knowledge and information about everything you want. Why must we leave a very important thing like a book Applied Predictive Modeling? Wide variety you have a different opinion about e-book. But one aim which book can give many info for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or info that you take for that, it is possible to give for each other; it is possible to share all of these. Book Applied Predictive Modeling has simple shape but the truth is know: it has great and large function for you. You can search the enormous world by wide open and read a reserve. So it is very wonderful.

Mariano Smith:

A lot of people always spent their particular free time to vacation as well as go to the outside with them household or their friend. Do you know? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. If you need to try to find a new activity here is look different you can read the book. It is really fun for you. If you enjoy the book that you simply read you can spent all day every day to reading a e-book. The book Applied Predictive Modeling it is rather good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. If you did not have enough space to create this book you can buy the particular e-book. You can m0ore simply to read this book from the smart phone. The price is not very costly but this book has high quality.

Angeline Stallings:

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library or to make summary for some guide, they are complained. Just little students that has reading's soul or real their passion. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Applied Predictive Modeling can make you really feel more interested to read.

Cynthia Gomez:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from the book. Book is created or printed or illustrated from each source in which filled update of news. On this modern era like now, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just searching for the Applied Predictive Modeling when you essential it?
