Stephen F. Sundlof, Jim E. Riviere, Arthur L. Craigmill

Handbook of Comparative Veterinary Pharmacokinetics and Residues of Pesticides and Environmental Contaminants Stephen F. Sundlof, Jim E. Riviere, Arthur L. Craigmill

Residues of drugs and chemicals in edible tissues of food-producing animals are a major public health concern. Until now, information on applications of pharmacokinetic principles to drug and chemical residue avoidance has been spread throughout literature. For the first time, this handbook brings this information together in a convenient and concise volume.

For easier reference, text is divided into three parts: physicochemical constants and chemical structures, legal tissue tolerances, and pharmacokinetic parameters derived from open literature. This is the only publication that offers all this information in a single source. For fast access, numerous tables present valuable pharmacokinetic data for drugs in serum, plasma, or blood and in other matrices. The authors include their own previously unpublished pharmacokinetic parameters, results of statistical analyses performed on time/concentration data tabulated in the primary sources. Helpful appendices contain FDA approved tolerances and action levels as well as chemical structures and physicochemical properties. This is an essential handbook for veterinarians, toxicologists, pharmacologists, animal scientists, food hygienists, and regulatory personnel involved in human food safety.

From reader reviews:

Michael Milliner:

Have you spare time for just a day? What do you do when you have more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a walk, shopping, or went to the particular Mall. How about open or maybe read a book eligible Handbook of Comparative Veterinary Pharmacokinetics and Residues of Pesticides and Environmental Contaminants? Maybe it is to be best activity for you. You realize beside you can spend your time with the favorite's book, you can wiser than before. Do you agree with it has the opinion or you have various other opinion?

Angela Heller:

Handbook of Comparative Veterinary Pharmacokinetics and Residues of Pesticides and Environmental Contaminants can be one of your basic books that are good idea. All of us recommend that straight away because this book has good vocabulary that will increase your knowledge in vocab, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort to get every word into satisfaction arrangement in writing Handbook of Comparative Veterinary Pharmacokinetics and Residues of Pesticides and Environmental Contaminants although doesn't forget the main level, giving the reader the hottest and based confirm resource details that maybe you can be one among it. This great information can easily drawn you into new stage of crucial considering.

Ashley Davis:

Are you kind of active person, only have 10 or maybe 15 minute in your time to upgrading your mind skill or thinking skill also analytical thinking? Then you are experiencing problem with the book than can satisfy your short space of time to read it because this time you only find guide that need more time to be read. Handbook of Comparative Veterinary Pharmacokinetics and Residues of Pesticides and Environmental Contaminants can be your answer as it can be read by an individual who have those short time problems.

Deborah Fishman:

Is it an individual who having spare time subsequently spend it whole day simply by watching television programs or just resting on the bed? Do you need something new? This Handbook of Comparative Veterinary Pharmacokinetics and Residues of Pesticides and Environmental Contaminants can be the reply, oh how comes? A book you know. You are consequently out of date, spending your spare time by reading in this new era is common not a geek activity. So what these publications have than the others?
