## Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems)

Shu-Ching Chen, R.L. Kashyap, Arif Ghafoor

*Semantic Models for Multimedia Database Searching and Browsing* begins with the introduction of multimedia information applications, the need for the development of the multimedia database management systems (MDBMSs), and the important issues and challenges of multimedia systems. The temporal relations, the spatial relations, the spatio-temporal relations, and several semantic models for multimedia information systems are also introduced. In addition, this book discusses recent advances in multimedia database searching and multimedia database browsing. More specifically, issues such as image/video segmentation, motion detection, object tracking, object recognition, knowledge-based event modeling, content-based retrieval, and key frame selections are presented for the first time in a single book. Two case studies consisting of two semantic models are included in the book to illustrate how to use semantic models to design multimedia information systems.

*Semantic Models for Multimedia Database Searching and Browsing* is an excellent reference and can be used in advanced level courses for researchers, scientists, industry professionals, software engineers, students, and general readers who are interested in the issues, challenges, and ideas underlying the current practice of multimedia presentation, multimedia database searching, and multimedia browsing in multimedia information systems.

### **From reader reviews:**

#### **Charles Wilkerson:**

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the Mall. How about open or read a book entitled Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems)? Maybe it is for being best activity for you. You recognize beside you can spend your time along with your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have additional opinion?

#### **Jennifer Handler:**

Book is to be different for each and every grade. Book for children until finally adult are different content. We all know that that book is very important for all of us. The book Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) has been making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The publication Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) is not only giving you far more new information but also to get your friend when you truly feel bored. You can spend your personal spend time to read your reserve. Try to make relationship with the book Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems). You never truly feel lose out for everything if you read some books.

#### **Suzanne Ferris:**

Typically the book Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) will bring someone to the new experience of reading the book. The author style to describe the idea is very unique. Should you try to find new book to study, this book very suited to you. The book Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) is much recommended to you to see. You can also get the e-book from official web site, so you can more readily to read the book.

#### **Mark Guerrero:**

This Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) is great e-book for you because the content which is full of information for you who else always deal with world and still have to make decision every minute. This specific book reveal it info accurately using great organize word or we can point out no rambling sentences inside. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only will give you straight forward sentences but tricky core information with lovely delivering sentences. Having Semantic Models for Multimedia Database Searching and Browsing (Advances in Database Systems) in your hand like obtaining the world in your arm, data in it is not ridiculous a single. We can say that no e-book that offer you world inside ten or fifteen moment right

but this guide already do that. So , this can be good reading book. Heya Mr. and Mrs. occupied do you still doubt this?
