Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science)

Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science)

The idea that some day robots may have emotions has captured the imagination of many and has been dramatized by robots and androids in such famous movies as *2001 Space Odyssey's* HAL or *Star Trek's* Data. By contrast, the editors of this book have assembled a panel of experts in neuroscience and artificial intelligence who have dared to tackle the issue of whether robots can have emotions from a purely scientific point of view. The study of the brain now usefully informs study of the social, communicative, adaptive, regulatory, and experimental aspects of emotion and offers support for the idea that we exploit our own psychological responses in order to feel others' emotions. The contributors show the many ways in which the brain can be analyzed to shed light on emotions. Fear, reward, and punishment provide structuring concepts for a number of investigations. Neurochemistry reveals the ways in which different "neuromodulators" such as serotonin, dopamine, and opioids can affect the emotional valence of the brain. And studies of different regions such as the amygdala and orbitofrontal cortex provide a view of the brain as a network of interacting subsystems. Related studies in artificial intelligence and robotics are discussed and new multi-level architectures are proposed that make it possible for emotions to be implemented. It is now an accepted task in robotics to build robots that perceive human expressions of emotion and can "express" simulated emotions to ease interactions with humans. Looking towards future innovations, some scientists posit roles for emotion with our fellow humans. All of these issues are covered in this timely and stimulating book which is written for researchers and graduated students in neuroscience, cognitive science, psychology, robotics, and artificial intelligence.

From reader reviews:

Walter Cornwell:

The guide with title Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) includes a lot of information that you can study it. You can get a lot of benefit after read this book. This particular book exist new know-how the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to find out how the improvement of the world. That book will bring you with new era of the glowbal growth. You can read the e-book on the smart phone, so you can read it anywhere you want.

Jessica Keith:

In this period of time globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher which print many kinds of book. The book that recommended to you is Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) this reserve consist a lot of the information on the condition of this world now. This book was represented just how can the world has grown up. The terminology styles that writer use to explain it is easy to understand. Often the writer made some research when he makes this book. That is why this book acceptable all of you.

Jennifer Johnson:

With this era which is the greater man or who has ability to do something more are more valuable than other. Do you want to become one among it? It is just simple strategy to have that. What you need to do is just spending your time not very much but quite enough to have a look at some books. One of several books in the top list in your reading list is actually Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science). This book which is qualified as The Hungry Hills can get you closer in turning into precious person. By looking right up and review this reserve you can get many advantages.

William Moreau:

A number of people said that they feel bored when they reading a book. They are directly felt this when they get a half elements of the book. You can choose typically the book Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) to make your reading is interesting. Your skill of reading skill is developing when you like reading. Try to choose basic book to make you enjoy to learn it and mingle the feeling about book and reading through especially. It is to be initial opinion for you to like to available a book and go through it. Beside that the book Who Needs Emotions?: The Brain Meets the Robot (Series in Affective Science) can to be your brand new friend when you're truly feel alone and confuse in doing what must you're doing of that time.
