Dalla Terra alla Luna: 303 (Classici) (Italian Edition) Jules verne

Dalla Terra alla Luna è un romanzo di fantascienza scritto da Jules Verne nel 1865. È la prima parte di un dittico che si chiude con *Intorno alla Luna*.

In questo romanzo Verne anticipa le prime fasi dello storico allunaggio avvenuto realmente oltre 100 anni dopo, il 20 luglio 1969.

I soci del Gun Club, associazione americana di artiglieri con sede a Baltimora, annunciano di aver inventato un cannone capace di sparare un proiettile in grado di raggiungere la Luna. Il progetto prevede che il proiettile sia di forma sferica, costruito in alluminio, e che il dispositivo di lancio, un'enorme bocca in ghisa scavata nel terreno, utilizzi come detonatore il Fulmicotone.

Alla presenza di spettatori arrivati da tutto il mondo, il proiettile viene quindi lanciato nello spazio. Ma non arriverà a destinazione: la capsula entrerà nell'orbita della Luna e le ruoterà attorno come un satellite. Gli astronauti a bordo si salveranno da una lunga agonia e dalla morte per asfissia o per fame, solamente grazie al loro ingegno.
