## **Lyapunov Functionals and Stability of Stochastic Functional Differential Equations** Leonid Shaikhet

Stability conditions for functional differential equations can be obtained using Lyapunov functionals.

Lyapunov Functionals and Stability of Stochastic Functional Differential Equations describes the general method of construction of Lyapunov functionals to investigate the stability of differential equations with delays. This work continues and complements the author's previous book Lyapunov Functionals and Stability of Stochastic Difference Equations, where this method is described for difference equations with discrete and continuous time.

The text begins with both a description and a delineation of the peculiarities of deterministic and stochastic functional differential equations. There follows basic definitions for stability theory of stochastic hereditary systems, and the formal procedure of Lyapunov functionals construction is presented. Stability investigation is conducted for stochastic linear and nonlinear differential equations with constant and distributed delays.

The proposed method is used for stability investigation of different mathematical models such as:

- inverted controlled pendulum;
- Nicholson's blowflies equation;
- predator-prey relationships;
- epidemic development; and
- mathematical models that describe human behaviours related to addictions and obesity.

Lyapunov Functionals and Stability of Stochastic Functional Differential Equations is primarily addressed to experts in stability theory but will also be of interest to professionals and students in pure and computational mathematics, physics, engineering, medicine, and biology.

Is it an individual who having spare time in that case spend it whole day by simply watching television programs or just resting on the bed? Do you need something totally new? This Lyapunov Functionals and Stability of Stochastic Functional Differential Equations can be the answer, oh how comes? The new book you know. You are and so out of date, spending your spare time by reading in this fresh era is common not a geek activity. So what these guides have than the others?

#### **Willie Batres:**

As a college student exactly feel bored for you to reading. If their teacher requested them to go to the library in order to make summary for some book, they are complained. Just small students that has reading's spirit or real their passion. They just do what the professor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring in addition to can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country.
