Nostalgic Angels: Rearticulating Hypertext Writing (Advances in Discourse Processes) Johndan Johnson-Eilola

This volume examines the complex, contradictory discourses of hypertext. Using theoretical material from cultural theory, radical and border pedagogies, and technology criticism, the text discusses three primary ways hypertext is articulated: as automated book (technical communication), as virtual commodity (online databases), and as environment for constructing and exploring multiple subject positions (postmodern hypertext in composition and literature). I would recommend the entire book to researchers and academics who recognize the need to integrate new technologies into our classrooms and pedagogies. - Technical Communication
