Pathophysiology for the Health Professions - E- Book Barbara E. Gould, Ruthanna Dyer

A concise, easy-to-understand introduction to the fundamentals, **Pathophysiology for the Health Professions, 4th Edition** helps you learn to identify disease processes and disorders. Authors Barbara Gould and Ruthanna Dyer continue the tradition of a text known for its readability and vivid, full-color illustrations, updated with the latest research and clinical advances. Unique *Challenge*, *Think About*, and *Emergency Treatment* features help in applying the material to real-life situations. No matter which area in the healthcare field you may enter, this book provides essential preparation for conditions encountered in clinical practice.

- **Concise and readable approach** includes the information students need without overwhelming them, even if they have a limited scientific background.
- **Unique Challenge feature** asks "What can go wrong with this structure or system?" as a way to help students facilitate progress by using previously learned knowledge.
- **Unique Think About boxes** help with self-evaluation, test preparation, and review.
- **Unique Emergency Treatment boxes** list basic emergency measures; these can be modified to fit specific professions, established protocols, or practice settings.
- **Research boxes** discuss new developments, problem areas of pathophysiology, and complications associated with research.
- **Warning Signs boxes** summarize conditions that may develop in patients.
- **Diagnostic tests and treatments** are included for each of the major disorders.
- **Case studies** in each chapter provide a basis for discussion or can be used as an assignment.
- **Study questions** offer a self-assessment on the material in each chapter.
- **Ready References** in the appendix provide a quick lookup for anatomic terms, conversion tables, abbreviations and acronyms, diagnostic studies and tests, and more.
- **A companion Evolve website** includes web links, learning activities, content updates, and more.
- New content on the **causes and trends related to disease, new drugs, technology, and treatment.**
- Coverage of **obesity and its complications**, including an in-depth discussion of metabolic syndrome.
- **Multiple disorder syndromes** in the aged client.
- **DNA, genetics and the Human Genome Project** with current research on protein pathways in health (proteomics) and the implications for drug treatment and disease causation.
- **Coverage of autism.**
- Updated content on the **H1N1 virus** and communicable diseases; **HIV, cancer causation, and immunology**; and **substance abuse** to reflect common practices in the use of illicit (street) drugs as well as abuse of prescription medications.
- **Case studies** revised to emphasize chronic diseases, prevention, and acute care, and to apply to a wider range of health professions.
- **Appendices** reorganized for improved reference and lookup.
