Edward Y. Chang

Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception Edward Y. Chang

"Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception" covers knowledge representation and semantic analysis of multimedia data and scalability in signal extraction, data mining, and indexing. The book is divided into two parts: Part I - Knowledge Representation and Semantic Analysis focuses on the key components of mathematics of perception as it applies to data management and retrieval. These include feature selection/reduction, knowledge representation, semantic analysis, distance function formulation for measuring similarity, and multimodal fusion. Part II - Scalability Issues presents indexing and distributed methods for scaling up these components for high-dimensional data and Web-scale datasets. The book presents some real-world applications and remarks on future research and development directions.

The book is designed for researchers, graduate students, and practitioners in the fields of Computer Vision, Machine Learning, Large-scale Data Mining, Database, and Multimedia Information Retrieval.

Dr. Edward Y. Chang was a professor at the Department of Electrical & Computer Engineering, University of California at Santa Barbara, before he joined Google as a research director in 2006. Dr. Chang received his M.S. degree in Computer Science and Ph.D degree in Electrical Engineering, both from Stanford University.

From reader reviews:

Allison Stiffler:

The experience that you get from Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception is the more deep you digging the information that hide inside the words the more you get thinking about reading it. It does not mean that this book is hard to understand but Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception giving you enjoyment feeling of reading. The writer conveys their point in certain way that can be understood through anyone who read it because the author of this book is well-known enough. This specific book also makes your current vocabulary increase well. That makes it easy to understand then can go with you, both in printed or e-book style are available. We advise you for having this specific Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception instantly.

Charlene Martinez:

The reserve untitled Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception is the publication that recommended to you to learn. You can see the quality of the guide content that will be shown to a person. The language that writer use to explained their ideas are easily to understand. The author was did a lot of investigation when write the book, therefore the information that they share for your requirements is absolutely accurate. You also might get the e-book of Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception from the publisher to make you considerably more enjoy free time.

Brenda Seddon:

Is it you actually who having spare time subsequently spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something new? This Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception can be the reply, oh how comes? It's a book you know. You are consequently out of date, spending your time by reading in this completely new era is common not a nerd activity. So what these books have than the others?

Dorothy Alvarez:

Guide is one of source of knowledge. We can add our knowledge from it. Not only for students but native or citizen need book to know the change information of year to help year. As we know those guides have many advantages. Beside many of us add our knowledge, also can bring us to around the world. From the book Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception we can have more advantage. Don't someone to be creative people? To become creative person must prefer to read a book. Simply choose the best book that ideal with your aim. Don't always be doubt to change your life at this time book Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception. You can more inviting than now.
