Nature's Chemicals: the Natural Products that shaped our world Richard Firth

Natural Products (NPs) is the term used to describe the hundreds of thousands of chemical compounds or substances that are continually produced by living organisms (plants and microbes). Hundreds of millions of tons of these chemicals are generated annually, and the trade in just a few of these has dominated human economic activity for thousands of years. Indeed the current world geopolitical map has been shaped by attempts to control the supply of a few of these compounds. Every day of our lives each human spends time and money trying to procure the NPs of their choice. However, despite their overwhelming influence on human culture, they remain poorly understood. Yet a knowledge of NPs can help in our search for new drugs, further the debate about GM manipulation, help us address environmental pollution, and enable a better understanding of drug trafficking.

Nature's Chemicals is the first book to describe Natural Products (NPs) in an evolutionary context, distilling the few simple principles that govern the way in which organisms (including humans) have evolved to produce, cope with, or respond to NPs. It neatly synthesizes a widely dispersed literature and provides a general picture of NPs, encompassing evolution, history, ecology, and environmental issues (along with some deeper theory relevant to biochemistry), with the goal of enabling a wider section of the scientific community to fully appreciate the crucial importance of Natural Products to human culture and future survival.

From reader reviews:

Todd Crain:

In this 21st one hundred year, people become competitive in each way. By being competitive right now, people have do something to make these survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated this for a while is reading. That's why, by reading a guide your ability to survive increase then having chance to stand up than other is high. In your case who want to start reading some sort of book, we give you this particular Nature's Chemicals: the Natural Products that shaped our world book as nice and daily reading guide. Why, because this book is greater than just a book.

Jimmy Robertson:

The book Nature's Chemicals: the Natural Products that shaped our world will bring you to definitely the new experience of reading a book. The author style to clarify the idea is very unique. If you try to find new book to read, this book very ideal to you. The book Nature's Chemicals: the Natural Products that shaped our world is much recommended to you you just read. You can also get the e-book from the official web site, so you can more easily to read the book.

Johanna Bassett:

The reserve with title Nature's Chemicals: the Natural Products that shaped our world has lot of information that you can study it. You can get a lot of benefit after read this book. This particular book exist new know-how the information that exist in this book represented the condition of the world at this point. That is important to yo7u to know how the improvement of the world. This specific book will bring you inside new era of the internationalization. You can read the e-book in your smart phone, so you can read this anywhere you want.

Barbara Jackson:

As a student exactly feel bored to help reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just tiny students that has reading's spirit or real their pastime. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that reading through is not important, boring as well as can't see colorful pics on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Nature's Chemicals: the Natural Products that shaped our world can make you truly feel more interested to read.
