Service Computing: Concept, Method and Technology Zhaohui Wu

Service computing is a cross-disciplinary field that covers science and technology, and represents a promising direction for distributed computing and software development methodologies. It aims to bridge the gap between business services and IT services by supporting the whole lifecycle of services innovation. Over the last ten years applications in industry and academic research have produced considerable progress and success

Service Computing: Concept, Method and Technology presents the concept of service computing and a proposed reference architecture for service computing research before proceeding to introduce two underlying technologies: Web services and service-oriented architecture. It also presents the authors' latest research findings on hot topics such as service discovery, recommendation, composition, verification, service trust, dynamic configuration and big data service. Some new models and methods are proposed including three service discovery methods based on semantics and skyline technologies, two service recommendation methods using graph mining and QoS prediction, two service composition methods with graph planning and one service verification method using π calculus and so on. Moreover, this book introduces JTang, an underlying platform supporting service computing, which is a product of the authors' last ten years of research and development.

- Systematically reviews all the research on service computing
- Introduces state-of-art research works on service computing and provides a road map for future directions
- Bridges the gap between service computing theory and practice
- Provides guidance for both industry and academia

From reader reviews:

Irving Hansen:

Inside other case, little individuals like to read book Service Computing: Concept, Method and Technology. You can choose the best book if you'd prefer reading a book. So long as we know about how is important a book Service Computing: Concept, Method and Technology. You can add understanding and of course you can around the world by just a book. Absolutely right, since from book you can realize everything! From your country until finally foreign or abroad you can be known. About simple factor until wonderful thing you could know that. In this era, you can open a book or perhaps searching by internet unit. It is called e-book. You may use it when you feel bored stiff to go to the library. Let's learn.

Vincent Baker:

The ability that you get from Service Computing: Concept, Method and Technology is a more deep you looking the information that hide in the words the more you get enthusiastic about reading it. It does not mean that this book is hard to be aware of but Service Computing: Concept, Method and Technology giving you thrill feeling of reading. The copy writer conveys their point in certain way that can be understood simply by anyone who read the item because the author of this book is well-known enough. That book also makes your own personal vocabulary increase well. So it is easy to understand then can go along with you, both in printed or e-book style are available. We highly recommend you for having this kind of Service Computing: Concept, Method and Technology instantly.

Dwight Case:

Service Computing: Concept, Method and Technology can be one of your beginning books that are good idea. All of us recommend that straight away because this publication has good vocabulary that may increase your knowledge in vocab, easy to understand, bit entertaining but delivering the information. The author giving his/her effort to get every word into joy arrangement in writing Service Computing: Concept, Method and Technology although doesn't forget the main point, giving the reader the hottest along with based confirm resource data that maybe you can be one among it. This great information may drawn you into fresh stage of crucial contemplating.

Carlie Manson:

In this era globalization it is important to someone to find information. The information will make anyone to understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of references to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher that print many kinds of book. Typically the book that recommended for you is Service Computing: Concept, Method and Technology this reserve consist a lot of the information on the condition of this world now. This specific book was represented how do the world has grown up. The words styles that writer value to explain it is easy to understand. The writer made some study when he makes this book. Honestly, that is why this book appropriate all of you.
