Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series) M. Godoy Simões

New perspectives on using induction generators in alternative energy technologies

Durable and cost-effective, induction power generators have undergone numerous improvements that make them an increasingly attractive option for renewable energy applications, particularly for wind and hydropower generation systems. From fundamental concepts to the latest technologies, **Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition** provides detailed and accurate coverage of all aspects related to the design, operation, and overall analysis of such systems.

Placing a greater emphasis on providing clear, precise, and succinct explanations, this second edition features new, revised, and updated content as well as figures, tables, equations, and examples. Each chapter introduces a multi-step, chapter-length problem relating the material to a real application. The solution appears at the end of the chapter, along with additional practice problems and references.

Totally re-written and updated chapter covering doubly-fed induction generators **Alternative Energy Systems** provides the tools and expertise for advanced students and professionals in electrical, mechanical, civil, and environmental engineering involved in the development of power plants. ";

From reader reviews:

Eduardo Baro: The book *Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)* can give more knowledge and information about everything you want. Why then must we leave a good thing like a book *Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)*? Some of you have a different opinion about book. But one aim which book can give many information for us. It is absolutely right. Right now, try to closer using your book. Knowledge or info that you take for that, you are able to give for each other; it is possible to share all of these. Book *Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)* has simple shape however you know: it has great and big function for you. You can appearance the enormous world by available and read a e-book. So it is very wonderful.

Ruby Pritchett: Information is provisions for folks to get better life, information presently can get by anyone from everywhere. The information can be a information or any news even restricted. What people must be consider any time those information which is in the former life are challenging be find than now is taking seriously which one would work to believe or which one typically the resource are convinced. If you receive the unstable resource then you get it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take *Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)* as the daily resource information.

Alberto Benson: Your reading 6th sense will not betray anyone, why because this *Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)* reserve written by well-known writer whose to say well how to make book which might be understand by anyone who else read the book. Written with good manner for you, dripping every ideas and composing skill only for eliminate your own hunger then you still uncertainty *Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)* as good book but not only by the cover but also from the content. This is one reserve that can break don't determine book by its include, so do you still needing yet another sixth sense to pick this particular!? Oh come on your looking at sixth sense already said so why you have to listening to one more sixth sense.

William Barnett: As a student exactly feel bored to help reading. If their teacher asked them to go to the library or even make summary for some guide, they are complained. Just little students that has reading's soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this *Alternative Energy Systems: Design and Analysis with Induction Generators, Second Edition (Power Electronics and Applications Series)* can make you sense more interested to read.
