This groundbreaking book is written by physician Mauro Di Pasquale, two-time Pan American, two-time North American, and eight-time Canadian Powerlifting Champion. Dr. Di Pasquale served as an advisor to the World Wrestling and World Bodybuilding Federations, has written for numerous health and bodybuilding publications, and has published several books and newsletters on sports-related issues. In this volume, he imparts his scientific knowledge as well as lessons learned from his own athletic achievement to give professional and recreational athletes the tools they need to improve performance using nutrition and nutritional supplements as alternatives to drug use.

The book begins with a brief review of energy and protein metabolism before describing the positive impact of supplementation on athletic performance, health, disease, and longevity. It reveals the actions of protein and amino acid supplements on muscle size and strength and energy metabolism as well as the role of specific amino acid supplements.

The second part of the book, the practical how-to section, Naturally Anabolic, advises the athlete on ways to achieve maximum progress while avoiding the use of anabolic drugs. It provides the inside scoop on how to use nutrition to manipulate anabolic hormones naturally, and how to lose body fat without sacrificing muscle. The final chapter reveals the secrets of powerful nutritional supplements that can enhance an athlete's performance. By following Dr. Di Pasquale's time-tested advice, athletes will get the inside edge over the competition and take their achievement to the next level.
