Ecosystem Services: concepts, methodologies and instruments for research and applied use (Quaderns de Medi Ambient) Sergi Nuss-Girona, Mita Castañer

The ecosystem services (ES) framework opens the door to common ground between ecology science and economics in facing the challenge of planetary sustainability. Application of the available methodologies and instruments reveals both the high potential and the controversies related to this new socio-ecological management approach. Feeding on the research, reviews and testimonies presented at the XV International Summer School on Environment (ISSE) of the University of Girona (2015), this proceedings book displays the main concepts related the ES approach and outcomes from case studies dealing with its operationalization. However, the ultimate goal of this crosswalk language remains; changing mentalities and raising awareness to the point of installing new socio-ecological values, leading society to economic models in which ES conservation is understood as subsistence premise and therefore an intrinsic component of profits.

El marc de serveis dels ecosistemes (ES) obre la porta a un terreny comú entre l'ecologia i l'economia de la ciència davant del repte de la sostenibilitat planetària . L'aplicació de les metodologies i instruments disponibles revela tant l'alt potencial i les controvèrsies relacionades amb aquest nou enfocament de la gestió socio- ecològica. L'alimentació en les investigacions, opinions i testimonis presentats a l'Escola XV Internacional d'Estiu sobre el Medi Ambient (IESS) de la Universitat de Girona (2015) , aquest llibre procediment mostra els principals conceptes relacionats amb l'enfocament d'ES i els resultats dels estudis de cas que s'ocupen de la seva posada en funcionament . No obstant això , l'objectiu final d'aquest llenguatge encreuament roman ; canviar les mentalitats i la sensibilització fins al punt de la instal·lació de nous valors socio- ecològica , el que porta la societat als models econòmics en què ÉS la conservació s'entén com a premissa de subsistència i , per tant , un component intrínsec dels guanys.
