Explorations of Mathematical Models in Biology with MATLAB

Mazen Shahin

Explorations of Mathematical Models in Biology with MATLAB Mazen Shahin
Explore and analyze the solutions of mathematical models from diverse disciplines

As biology increasingly depends on data, algorithms, and models, it has become necessary to use a computing language, such as the user-friendly MATLAB, to focus more on building and analyzing models as opposed to configuring tedious calculations. *Explorations of Mathematical Models in Biology with MATLAB* provides an introduction to model creation using MATLAB, followed by the translation, analysis, interpretation, and observation of the models.

With an integrated and interdisciplinary approach that embeds mathematical modeling into biological applications, the book illustrates numerous applications of mathematical techniques within biology, ecology, and environmental sciences. Featuring a quantitative, computational, and mathematical approach, the book includes:

- Examples of real-world applications, such as population dynamics, genetics, drug administration, interacting species, and the spread of contagious diseases, to showcase the relevancy and wide applicability of abstract mathematical techniques
- Discussion of various mathematical concepts, such as Markov chains, matrix algebra, eigenvalues, eigenvectors, first-order linear difference equations, and nonlinear first-order difference equations
- Coverage of difference equations to model a wide range of real-life discrete time situations in diverse areas as well as discussions on matrices to model linear problems
- Solutions to selected exercises and additional MATLAB codes

Explorations of Mathematical Models in Biology with MATLAB is an ideal textbook for upper-undergraduate courses in mathematical models in biology, theoretical ecology, bioeconomics, forensic science, applied mathematics, and environmental science. The book is also an excellent reference for biologists, ecologists, mathematicians, biomathematicians, and environmental and resource economists.

From reader reviews:

Sally McGarvey:

Here thing why this specific Explorations of Mathematical Models in Biology with MATLAB are different and dependable to be yours. First of all reading through a book is good but it really depends in the content of computer which is the content is as tasty as food or not. Explorations of Mathematical Models in Biology with MATLAB giving you information deeper and in different ways, you can find any publication out there but there is no guide that similar with Explorations of Mathematical Models in Biology with MATLAB. It gives you thrill looking at journey, its open up your personal eyes about the thing in which happened in the world which is possibly can be happened around you. It is easy to bring everywhere like in park your car, café, or even in your means home by train. If you are having difficulties in bringing the imprinted book maybe the form of Explorations of Mathematical Models in Biology with MATLAB in e-book can be your choice.

Colin Rousey:

Many people spending their time frame by playing outside using friends, fun activity using family or just watching TV the entire day. You can have new activity to enjoy your whole day by looking at a book. Ugh, do you think reading a book will surely hard because you have to use the book everywhere? It all right you can have the e-book, taking everywhere you want in your Smartphone. Like Explorations of Mathematical Models in Biology with MATLAB which is finding the e-book version. So , why not try out this book? Let's notice.

Gary Lewis:

This Explorations of Mathematical Models in Biology with MATLAB is brand new way for you who has fascination to look for some information mainly because it relief your hunger of information. Getting deeper you onto it getting knowledge more you know or you who still having little bit of digest in reading this Explorations of Mathematical Models in Biology with MATLAB can be the light food for yourself because the information inside this specific book is easy to get through anyone. These books build itself in the form that is reachable by anyone, yes I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this guide is the answer. So you cannot find any in reading a reserve especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss the item! Just read this e-book sort for your better life along with knowledge.

Kenneth Matson:

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book ended up being rare? Why so many question for the book? But any people feel that they enjoy to get reading. Some people likes studying, not only science book and also novel and Explorations of Mathematical Models in Biology with MATLAB or even others sources were given understanding for you. After you know how the fantastic a

book, you feel want to read more and more. Science guide was created for teacher as well as students especially. Those books are helping them to bring their knowledge. In some other case, beside science guide, any other book likes Explorations of Mathematical Models in Biology with MATLAB to make your spare time much more colorful. Many types of book like here.
